

Announcing: The Center for Racial Equity and Systemic Transformation (CREST)

CREST is an arm of Google's Equity, Diversity, Inclusion, and Integrity (EDII) team. Under the leadership of its founder Dr. Myosha McAfee, CREST creates and tests different models to attenuate structural racism and other forms of structural inequity based on class, gender, etc.

Sojourn is CREST's learning journey to transform mental models around race and its intersections.
